STERILITY TEST

Method of Analysis No.: Micro/MoA 005

| MICROBIOLOGY LAB NO. | | | DATE RECEIVED | | | DATE TEST SET | | | DATE OF RESULTS | | |
|--|-----------|-----|---------------------------|---------------------------------|------------|--------------------------|--------------------------|-----------------------|--------------------|-----------|--|
| BIOL/001/2015 | | | 2015-07-10 | | | 05-08-2015 | | | 19-08-2015 | | |
| METHODOLOGY: Method Used | | | N | ΛF | Membran | e Filtration | /7 | (T' 1 ' ') | | | |
| | | | | | Direct Inc | oculation | (1 | (Tick as appropriate) | | | |
| Quantity Used per | nedia: | | | 1 Items | | | | | | | |
| SAMPLE PREPARATION | | | | | | | | | | | |
| | | | | | | | | | | | |
| RESULTS | | | | | | | | | | | |
| | Sample | | Positive C | | Control | Negative Contr | ol Posi | Positive Sample Conti | | e Control | |
| Fluid Thioglycolate | | | B. subtilis NC10400 | (÷rowth | | | B. su (NC: | | | Growth | |
| Medium | No Growth | | | . aeruginosa NC12924) Growth | | No Growth | P. ae (NC | _ | | | |
| Soya Bean Digest Medium | No Growth | | B. subtilis NC10400 | I Growin | | No Growth | B. su (NC: | | Growth | | |
| | | | C. albicans (NCPF3179) | | Growth | No Growin | C. al (NC) | | | Growth | |
| Key: (Tick: $\sqrt{\ }$) - Indicates turbidity, hence microbial growth; (Cross: X) - Indicates clear, hence no microbial growth. | | | | | | | | | | | |
| REMARKS | | | | | | | | | | | |
| *Inoculation of Soya Bean Digest Agar & Sabourauds Dextrose Agar | | | | | | | | | | | |
| | | | | Sample | | | Ne | Negative Control | | | |
| Soya Bean Digest Agar | | | | | | | | | | | |
| Sabourauds Dextrose Agar | | | | | | | | | | | |
| CONCLUSION: The Product | | Yes | Comp | olies | | | With the requirements of | | | | |
| | | | Does Not Comply | | | | the Sterility Test. | | | | |

^{*} Done as a confirmation test where any turbidity observed is suspected to be due to particles from the sample, or due to a reaction between the sample and the media.
